

# Minerva Engineering Wins Wireless Infrastructure Security Contract

Hanover, MD – April 10, 2015

Minerva Engineering announced today that it was the recipient of a prime contract award from the Department of Defense (DoD) to assess and defend the emerging wireless infrastructure across the Intelligence Community (IC) and the DoD.

This five year contract will require Minerva Engineering to assess facilities and create, prototype, test, and deliver defensive concepts, techniques, algorithms, and products for defending and detecting compromises of classified networks employing “wireless technologies”. Minerva Engineering will be leading multiple projects to discover hardware and software vulnerabilities in commercial mobile devices and mobile device infrastructure deployments, and evaluate and provide a comprehensive analysis of potentially compromised mobile devices provided by customers. Tasks include but are not limited to:

- Researching new and emerging technologies and technology trends, providing comprehensive technology reports and subsequent analytical research into exploitation opportunities;
- Identifying new development methodologies, platforms, and procedures to improve processing and prototype capabilities; and,
- Designing, creating, delivering developing, and testing for the prototype systems.

Minerva Engineering is a verified Service-Disabled Veteran-Owned Small Business (SDVOSB) providing information security products and services that support defense-in-depth strategies featuring technologies and processes to harden, defend and secure complex systems for the Intelligence Community, Department of Defense and other federal agencies. Minerva specializes in defensive cyber operations and information security including information assurance, risk assessment and mitigation, vulnerability assessment and penetration testing, secure network engineering, operations and maintenance and defensive network operations. With a demonstrated history of performance, cost and schedule success, Minerva’s experienced, innovative and dedicated professional multi-disciplinary engineering team of “Integrationeers” mitigates program risk and changes problem areas into success areas. Minerva is headquartered in Hanover, MD and is hiring for a large variety of open positions. For more information, visit [www.minervaengineering.com](http://www.minervaengineering.com).
